

3

Session Three: ASP.NET Web Pages

You cannot open a book without learning something.

Confucius, Chinese philosopher (551BC – 479BC)

At this point you have a good grounding in how HTML, CSS and JavaScript are all interpreted by a web browser in order to display a web page.

In this session you'll see how ASP.NET integrates with HTML, CSS and JavaScript to create exciting interactive web sites.

You'll also write your first C# code in this session.

Session Objectives

By the end of this session you will be able to:

- Change properties with C#
- Add event handlers to Controls
- Use Breakpoints
- Use Watches and Locals
- Understand the Exception object
- Understand the Page object
- Understand Request and Response
- UnderstandPostBack
- Work with ViewState
- Move between pages using C#
- Send data between pages
- Use Session
- Edit the Web.config file
